

Caring for Caregivers

If you care for a loved one who received a moderate or severe traumatic brain injury in OIF/OEF, we would like to talk to you about your health and well-being.

If you or someone you know may be interested in joining the Caregiver Study, please call 855-821-1469 or email caregiver.study@dvbic.org.

Purpose: The purpose of this study is to conduct research requested by Congress to determine caregiver health care needs. Participate in small group discussions, one-on-one interviews, and online surveys.

Benefits: Inform Congress of your health care needs. May improve health care services provided to you and your loved one.

Time Commitment: Should not exceed approximately 7-8 hours in total over a maximum of 3 years.

You may receive payment for your participation.
